DETAILED ACT

Claims 121-140 are currently pending.

ELECTION OF SPECIES

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

A. RECOGNITION MOIETY

B. ANALYTE

C. PATTERNED SURFACE (SEE CLAIM 124 MARKUSH)

The above "generic" and "markush" categories of A-C contain members thereof which are independent and/or distinct from each other since they each encompass compound structures and/or modes of action which are different mechanically, chemically and/or biologically; the compounds are capable of separate manufacture and/or use; differ in reactivity and/or the ability to be incorporated into a device or method. Therefore, the different groups (e.g. A-C) and individual members thereof) have different issues regarding patentability and require different and individually burdensome manual and/or computer classification and/or bibliographic searches.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (e.g. a specific compound or class of compounds for a recognition moiety or analyte and a specific species of patterned surface) from each of the above categories (if applicable) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be

Application/Control Number: 09/898,132

Art Unit: 1639

allowable. For example, if a biomolecule is elected applicant must elect at least a specific category of biomolecule (e.g protein, nucleic acid etc.)

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1639

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

General information regarding further correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Celsa whose telephone number is (703) 305-7556.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew J. Wang (art unit 1639), can be reached at (703)306-3217.

Any inquiry of a general nature, or relating to the status of this application, should be directed to the Group receptionist whose telephone number is (703) 308-0196.
